ITEM CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and per 1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

P.O. 1145  
Cedar Ridge, CA 95924-1145

Dear Mr. Verdin:

## STATEMENT 1526 LITTLE GREENHORN CREEK IN NEVADA COUNTY

This letter is to summarize our telephone conversation of February 14, 1994, which was in response to your February 8, 1994 letter regarding property on Little Greenhorn Creek owned by the Estate of Juanita Browne. You requested that certain portions of your letter be answered in writing.

We have no record of a post-1914 appropriation for the subject property, but in 1967, a Statement of Water Diversion and Use (Statement) was filed by Pete Browne. The Statement is not a water right, nor are there any fees associated with it or with the subsequent supplemental statements which have been filed each third year after the initial Statement. Statements are notices to the Division of Water Rights required of most diverters of surface water who are relying on riparian and/or pre-1914 appropriative rights. Mr. Brown reported that he has been irrigating up to 15 acres of Christmas trees from Little Greenhorn Creek, apparently on both the parcel mentioned in your letter and an adjacent parcel 19 to the west, both of which appear to be riparian to the subject creek.

Mr. Brown reported that use of water commenced around 1880, but for a pre-1914 appropriative right to be still valid, use would have had to be continuous, i.e. without a 5-year (consecutive) lapse of use, under most circumstances.

It appears that a correlative share of the natural flow of Little Greenhorn Creek may be diverted under claim of riparian right for irrigation of this property. Other landowners adjacent to this creek would likely have similar rights of equal priority.

If you have any questions, please give me a call at the above telephone number.

Sincerely,

re: County of Nevada, Little Greenhorn Creek Watershed, Headwaters at the  
Nevada Irrigation District Loma Rica Reservoir; Individual Owner(s), State  
Water Resources Rights

Dear Mr. Smith:

It is my understanding, based upon previous discussions with a fellow property owner in the area, that your Department recognizes that NID has acquired the appropriative rights to the watersheds leading to the Rollins reservoir. The acquisition of those water rights assigned to the land in eminent domain are apparently senior to normal riparian rights. It is our further understanding that the Little Greenhorn Creek watershed area is one of the few that exist in which riparian rights are not always senior.

Upon receipt, would you please take a moment to research the following property vis-a-vis riparian rights and authorization from Water Resource Control Board to draw amounts "as needed" from the Little Greenhorn Creek:

Topographical: SW $\frac{1}{4}$  of NW $\frac{1}{4}$  of Section 32,  
T 16 N, R 9 E, Chicago Park Quad, 7.5' Series

5-1526

Assessor's Parcel Number: 06-830-17, 7.35 acres±

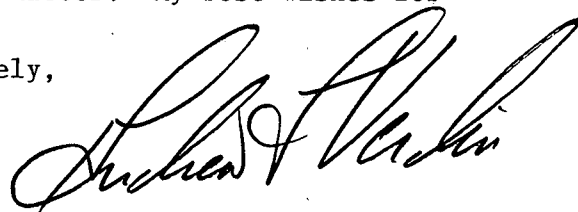

Situs Address: 12469 The Hollow, the extension  
of Lower Anchor Lane off Greenhorn Road, Grass Valley

Owner: Estate of Juanita Browne, Trustee  
12469 The Hollow  
Grass Valley, CA. 95945

Some individuals believe that the owners of the referenced parcel pay an annual fee to the Water Resource Control Board for appropriate rights to the flow. Would you please ascertain whether or not said property is registered with your Board for appropriative or riparian right of use.

Also, in reviewing the files for the Area in Question, does your Department have other parcels registered and/or paying annual fees for continuance of Appropriative Rights/Riparian Use within the Little Greenhorn Creek watershed? Thank you for your time and cooperation in this matter. My best wishes for a pleasant Spring.

Sincerely,

STATE WATER RESOURCES CONTROL BOARD

### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:
